# JV 902 GENESI

ITALIAN DESIGN

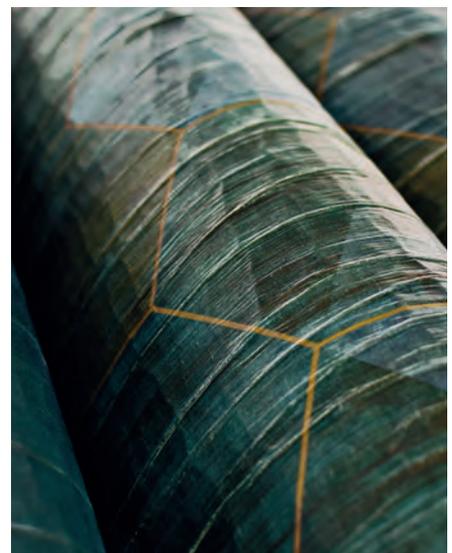

by Jannelli & Volpi

Three-dimensionality - combined with a deep study of materials - plays a very important role. The name of the Collection JV902 Genesi evokes the Origin. The product has an international vocation and it's characterized by a high level of technicality which results in high quality.

The designs are printed on a textured non-woven substrate with gold and silver inks with essential tones. They include Mediterranean landscapes which remind you of the villages of Greece and refined brushstrokes which create a marbling effect (see images below).

Among the geometric patterns, you can find three-dimensional cubes combined in such a way so as to create a dance (see images below).

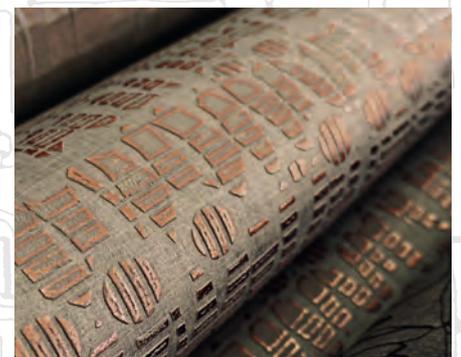

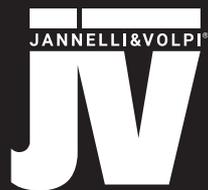

As well as fragments of pebbles composing a puzzle. Gold, silver, ecru/brown, petrol blue, copper, gray and sage green, these are the colors that distinctively characterize the collection.

The Genesis JV902 collection - which is part of the offer of the JV Italian Design line by Jannelli&Volpi - is composed of 90 cm wide items sold by linear meter.
